

Abstract Topics

1. Basic Science of Neuromodulation

2. Neuroprosthetics / Neural Engineering / Brain Computer Interface / Artificial Intelligence

3. Socioeconomics of Neuromodulation

4. Brain

– Invasive

Movement Disorders

Psychiatric Disorders

Epilepsy

Neurorehabilitation

Pain

– Non-Invasive Stimulation

Movement Disorders

Psychiatric Disorders

Epilepsy

5. Spinal Cord

- Pain
- Intrathecal Drug Delivery for Pain
- Spasticity
- Functional Restoration
- Cardiovascular

6. Peripheral Nerve

- Headache
- Pain
- Gastrointestinal
- Genitourinary
- Systemic Disease

7. Late Breaking Research ([Click here for more details](#))

8. Other
